AFROLANDX

Completed Website Checklist

Verified implementation inventory · Updated 22 September 2026

> **Scope:** This document lists website capabilities already implemented in the current codebase. Provider-dependent features and unfinished work are identified separately.

Public storefront

- ✓ Responsive public landing page
- ✓ Product detail pages with images, sizes and stock
- ✓ Product stories, materials and cultural information
- ✓ Responsive navigation, footer and mobile layouts
- ✓ Stock and size validation for cart items
- ✓ Product catalogue, search, filters and categories
- ✓ NGN pricing with local-currency display support
- ✓ Featured products and return-policy classifications
- ✓ Shopping cart with add, update, remove and clear actions

Accounts and authentication

- ✓ Registration, login and logout
- ✓ Email sign-in code flow
- ✓ Customer profile editing
- ✓ Protected customer, vendor and administrator pages
- ✓ Guest checkout redirects to login
- ✓ Email verification and password reset flows
- ✓ Secure authenticated sessions and timeout handling
- ✓ Customer, vendor and administrator roles
- ✓ Account deletion with dependent-data cleanup

Saved delivery addresses

- ✓ Create, update and delete saved addresses
- ✓ Default or latest-address checkout prefill
- ✓ Immutable order address snapshots
- ✓ Address labels and one-default-address enforcement
- ✓ Owner-only access controls
- ✓ Safe cleanup during account deletion

Checkout and payments

- ✓ Authenticated checkout and validated address form
- ✓ Server-side product, size and stock validation
- ✓ Paystack initialization, callback and webhook handling
- ✓ Safe pending-payment retry
- ✓ Idempotent completion and cart clearing
- ✓ Refund, transfer and OTP finalization support
- ✓ 8% merchandise commission with shipping excluded
- ✓ Server-calculated NGN merchandise totals
- ✓ Duplicate checkout request protection
- ✓ Reference, amount, currency, metadata and signature verification
- ✓ Stock reservation after verified payment
- ✓ Separate shipping payment support
- ✓ Vendor ledger and settlement reconciliation

Shipping

- ✓ Eight supported carrier options
- ✓ Static, explainable carrier recommendations
- ✓ Manual carrier override
- ✓ Administrator quote review and rejection notes
- ✓ Automatic reuse of matching confirmed quotes
- ✓ Atomic quote reservation
- ✓ Safe estimated-to-final shipping reconciliation
- ✓ Server-generated NGN testing estimates
- ✓ Destination, weight and order-value recommendation rules
- ✓ Buyer shipping quote requests
- ✓ Quote expiration and cart/address binding
- ✓ Confirmed quotes prioritized over recommendations
- ✓ Replacement quote requests

Orders and repeat purchases

- ✓ Customer order history and item details
- ✓ Selected sizes and tracking display
- ✓ Buy again from a previous order
- ✓ Quantity clamping and unavailable-item summaries
- ✓ Payment, shipping and fulfillment status display
- ✓ Safe customer cancellation rules
- ✓ Current approval, stock and size checks
- ✓ Race-safe cart restoration

Fulfillment and tracking

- ✓ Pending, processing, shipped, delivered and cancelled states
- ✓ Vendor and administrator fulfillment controls
- ✓ Atomic shipment and tracking update
- ✓ Vendor earnings release after valid delivery
- ✓ Automatic stalled-order scan every 15 minutes
- ✓ Advisory alerts cannot cancel, refund, deliver or release earnings
- ✓ Controlled conditional status transitions
- ✓ Tracking required before shipment
- ✓ Atomic delivered transition
- ✓ Workshop and production-step management
- ✓ Alerts for quote delays, processing delays, missing tracking and failed stock reservation

Vendor tools

- ✓ Vendor registration, profiles and approval states
- ✓ Product creation, editing and deletion
- ✓ Vendor order management and shipment tracking
- ✓ Vendor notifications
- ✓ Vendor dashboard and Shop as buyer navigation
- ✓ Images, prices, stock, sizes, variants and SKUs
- ✓ Vendor workshop and production steps
- ✓ Finance dashboard, ledger, payout accounts and settlements

Admin tools

- ✓ Protected administration dashboard
- ✓ Vendor review, approval, rejection and suspension
- ✓ Order and tracking oversight
- ✓ Refunds, chargebacks and financial reconciliation
- ✓ Event, quiz and content management
- ✓ Stalled-order notifications
- ✓ User and role management
- ✓ Product moderation and featured-product management
- ✓ Shipping quote review
- ✓ Vendor settlement management
- ✓ Discover inquiry, booking and premium management

Engagement and community

- ✓ Measurements and fit profiles
- ✓ Reviews and feedback
- ✓ Quizzes and results
- ✓ Discover Africa and Discover Nigeria experiences
- ✓ Collaboration drops and RSVPs
- ✓ Persistent in-app notifications and chatbot interface
- ✓ Order measurement alerts
- ✓ Loyalty accounts, events and referrals
- ✓ Lookbooks and occasion recommendations
- ✓ Events and cultural content
- ✓ Buyer-vendor messaging and unread counts

Security and reliability

- ✓ Authentication and role middleware
- ✓ Vendor ownership checks
- ✓ Webhook and payment verification
- ✓ Conditional fulfillment transitions
- ✓ File path and upload validation
- ✓ Direct insecure order creation blocked
- ✓ Owner-scoped addresses, carts, orders and notifications
- ✓ Server-controlled payment totals
- ✓ Safe stock and shipping quote reservation
- ✓ Vendor-ledger safeguards
- ✓ Database constraints and indexes
- ✓ Authentication cannot bypass failed email delivery

Testing and readiness

- ✓ TypeScript compilation passes
- ✓ Authentication delivery-failure tests
- ✓ Paystack, refund, transfer and finance tests
- ✓ Shipping recommendation and fingerprint tests
- ✓ Development database schema applied
- ✓ Homepage and checkout authentication route visually verified
- ✓ Production frontend and server build passes
- ✓ Order security and processing tests
- ✓ Return-policy tests
- ✓ 25 payment/order/finance tests passing
- ✓ Application workflow running on port 5000

Implemented but provider-dependent

- ◖ Transactional email delivery
- ◖ Live Paystack money movement
- ◖ AI listing assistance
- ◖ Google Maps and location services
- ◖ Discover premium payments
- ◖ Inbound email and replies
- ◖ AI product-image enhancement
- ◖ Body scanning
- ◖ Cloud object storage
- ◖ Live carrier operations

These capabilities exist in the application but require valid provider configuration or external service availability.

Not yet completed

- ○ Reliable replies to Afrolandx email addresses
- ○ Revocation of previously exposed email credentials
- ○ Shipping-agent product verification
- ○ Photo-to-listing automatic drafting
- ○ Remaining international shipping operations
- ○ Automatic inbound-mail failure detection
- ○ Automated CAC registry verification
- ○ Final public refund policy repair
- ○ Additional payout, refund, image, Collabs, Discover and buying-flow regression coverage
